Drug and Alcohol Dependence 34 (1994) 265–267

DRUG and ALCOHOL DEPENDENCE

Subject index

Volume 34 (1994)

addiction, association, twin, cocaine, heroin, 161
addiction, naltrexone, opium, heroin, adult, 231
Addiction Severity Index, reliability, interviewer severity rating, composite scores, 201
Adolescent Substance Use Questionnaire, reliability and validity, United Kingdom, 191
adult, naltrexone, opium, addiction, heroin, 231
aggression, dopamine D_2 receptor, alcoholism, drug addiction, polysubstance abuse, 175
alcohol, cocaine, cocaine dependence, behavioral treatment, contigency management, Community Reinforcement Approach, disulfiram, marijuana, 87
alcohol, ethanol, self-administration, rats, drug reinforcement, multiple schedules, persistence, relative reinforcing effects, 71
alcohol, injury, general population, 217
alcohol, intestine, protein turnover, protein synthesis, ethanol, alcoholism, 1
alcohol, young children, odour recognition, family, alcohol education, 29
alcohol deprivation, morphine withdrawal, cross-maze exploration, startle response, tail-flick test, 59
alcohol education, alcohol, young children, odour recognition, family, 29
alcoholism, dopamine D_2 receptor, drug addiction, polysubstance abuse, aggression, 175
alcoholism, intestine, protein turnover, protein synthesis, ethanol, alcohol, 1
antisocial, personality disorder, psychiatric distress, drug abuse, 149
antisocial personality disorder, methadone, symptoms, drug use, 253
association, addiction, twin, cocaine, heroin, 161

behavioral treatment, cocaine, cocaine dependence, contigency management, Community Reinforcement Approach, disulfiram, alcohol, marijuana, 87 benzodiazepines, methadone, HIV, IDU, 67

cholestystokinin, cocaine, drug discrimination, MK-329, CI-988, 105
CI-988, cocaine, drug discrimination, cholestystokinin, MK-329, 105
cigarette smoking, nicotine dependence, pepper, sensory, reinforcement, mood, 225
cocaine, association, addiction, twin, heroin, 161
cocaine, cocaine dependence, behavioral treatment, contigency management, Community Reinforcement Approach, disulfiram, alcohol, marijuana, 87
cocaine, craving, urges, questionnaire, 19
cocaine, drug discrimination, cholestystokinin, MK-329, CI-988, 105
cocaine, epidemiology, trends, Spain, 45
cocaine, procaine, self-administration, rhesus monkeys, delay-of-reinforcement, 37
cocaine dependence, cocaine, behavioral treatment, contigency management, Community Reinforcement Approach, disulfiram, alcohol, marijuana, 87
cognitive performance, nicotine, subjective effects, humans, nonsmokers, 11
Community Reinforcement Approach, cocaine, cocaine dependence, behavioral treatment, contigency management, disulfiram, alcohol, marijuana, 87
composite scores, Addiction Severity Index, reliability, interviewer severity rating, 201
contigency management, cocaine, cocaine dependence, behavioral treatment, Community Reinforcement Approach, disulfiram, alcohol, marijuana, 87
craving, urges, cocaine, questionnaire, 19
cross-maze exploration, alcohol deprivation, morphine withdrawal, startle response, tail-flick test, 59
cross-section survey, HIV transmission knowledge, injecting drug users, 181

delay-of-reinforcement, cocaine, procaine, self-administration, rhesus monkeys, 37
depression, hopelessness, HIV, intravenous drug users, suicidal ideation, 99
diagnostic interview schedule, substance use, medical and pharmacy students, Venezuela, 121
diazepam, ethanol, drug preference, subjective effects, individual differences, 243
disulfiram, cocaine, cocaine dependence, behavioral treatment, contigency management, Community Reinforcement Approach, alcohol, marijuana, 87
dopamine D_2 receptor, alcoholism, drug addiction, polysubstance abuse, aggression, 175
drug abuse, antisocial, personality disorder, psychiatric distress, 149
drug abuse treatment, HIV infection, risk behavior, 129
drug addiction, dopamine D_2 receptor, alcoholism, polysubstance abuse, aggression, 175
drug discrimination, cocaine, cholestystokinin, MK-329, CI-988, 105
drug preference, ethanol, diazepam, subjective effects, individual differences, 243
drug reinforcement, ethanol, alcohol, self-administration, rats, multiple schedules, persistence, relative reinforcing effects, 71
drug use, IDU not-in-treatment, HIV risk-taking, hallucinogens, 155
drug use, methadone, antisocial personality disorder, symptoms, 253
drug use, methadone maintenance, HIV, risk behaviour, knowledge, 113

epidemiology, cocaine, trends, Spain, 45
ethanol, alcohol, self-administration, rats, drug reinforcement, multiple schedules, persistence, relative reinforcing effects, 71
ethanol, diazepam, drug preference, subjective effects, individual differences, 243
ethanol, human cooperative behavior, 139
ethanol, intestine, protein turnover, protein synthesis, alcohol, alcoholism, 1

family, alcohol, young children, odour recognition, alcohol education, 29

SSDI 0376-8716(94)00999-V

general population, alcohol, injury, 217

hallucinogens, IDU not-in-treatment, HIV risk-taking, drug use, 155
heroin, association, addiction, twin, cocaine, 161
heroin, naltrexone, opium, addiction, adult, 231
HIV, hopelessness, intravenous drug users, suicidal ideation, depression, 99
HIV, methadone, benzodiazepines, IDU, 67
HIV, methadone maintenance, drug use, risk behaviour, knowledge, 113
HIV infection, risk behavior, drug abuse treatment, 129
HIV risk-taking, IDU not-in-treatment, drug use, hallucinogens, 155
HIV transmission knowledge, injecting drug users, cross-section survey, 181
hopelessness, HIV, intravenous drug users, suicidal ideation, depression, 99
human cooperative behavior, ethanol, 139
humans, nicotine, cognitive performance, subjective effects, non-smokers, 11

IDU, methadone, HIV, benzodiazepines, 67
IDU not-in-treatment, HIV risk-taking, drug use, hallucinogens, 155
individual differences, ethanol, diazepam, drug preference, subjective effects, 243
injecting drug users, HIV transmission knowledge, cross-section survey, 181
injury, alcohol, general population, 217
interviewer severity rating, Addiction Severity Index, reliability, composite scores, 201
intestine, protein turnover, protein synthesis, ethanol, alcohol, alcoholism, 1
intravenous drug users, hopelessness, HIV, suicidal ideation, depression, 99

knowledge, methadone maintenance, HIV, drug use, risk behaviour, 113

marijuana, cocaine, cocaine dependence, behavioral treatment, contigency management, Community Reinforcement Approach, disulfiram, alcohol, 87
medical and pharmacy students, substance use, Venezuela, diagnostic interview schedule, 121
methadone, antisocial personality disorder, symptoms, drug use, 253
methadone, HIV, benzodiazepines, IDU, 67
methadone dosage, social support, methadone maintenance, therapeutic compliance, 163
methadone maintenance, HIV, drug use, risk behaviour, knowledge, 113
methadone maintenance, methadone dosage, social support, therapeutic compliance, 163
methadone maintenance, tobacco smoking, nicotine, self-monitoring, 237
MK-329, cocaine, drug discrimination, cholestystokinin, CI-988, 105
mood, cigarette smoking, nicotine dependence, pepper, sensory, reinforcement, 225
morphine withdrawal, alcohol deprivation, cross-maze exploration, startle response, tail-flick test, 59
multiple schedules, ethanol, alcohol, self-administration, rats, drug reinforcement, persistence, relative reinforcing effects, 71

naltrexone, opium, addiction, heroin, adult, 231
nicotine, cognitive performance, subjective effects, humans, non-smokers, 11 nicotine, methadone maintenance, tobacco smoking, self-monitoring, 237
nicotine addiction, nicotine dependence, smoking cessation, smoking, tobacco use, 211
nicotine dependence, cigarette smoking, pepper, sensory, reinforcement, mood, 225
nicotine dependence, smoking cessation, nicotine addiction, smoking, tobacco use, 211
non-smokers, nicotine, cognitive performance, subjective effects, humans, 11

odour recognition, alcohol, young children, family, alcohol education, 29
opium, naltrexone, addiction, heroin, adult, 231

pepper, cigarette smoking, nicotine dependence, sensory, reinforcement, mood, 225
persistence, ethanol, alcohol, self-administration, rats, drug reinforcement, multiple schedules, relative reinforcing effects, 71
personality disorder, antisocial, psychiatric distress, drug abuse, 149
polysubstance abuse, dopamine D_2 receptor, alcoholism, drug addiction, aggression, 175
procaine, cocaine, self-administration, rhesus monkeys, delay-of-reinforcement, 37
protein synthesis, intestine, protein turnover, ethanol, alcohol, alcoholism, 1
protein turnover, intestine, protein synthesis, ethanol, alcohol, alcoholism, 1
psychiatric distress, antisocial, personality disorder, drug abuse, 149

questionnaire, craving, urges, cocaine, 19

rats, ethanol, alcohol, self-administration, drug reinforcement, multiple schedules, persistence, relative reinforcing effects, 71
reinforcement, cigarette smoking, nicotine dependence, pepper, sensory, mood, 225
relative reinforcing effects, ethanol, alcohol, self-administration, rats, drug reinforcement, multiple schedules, persistence, 71
reliability, Addiction Severity Index, interviewer severity rating, composite scores, 201
reliability and validity, Adolescent Substance Use Questionnaire, United Kingdom, 191
rhesus monkeys, cocaine, procaine, self-administration, delay-of-reinforcement, 37
risk behavior, HIV infection, drug abuse treatment, 129
risk behaviour, methadone maintenance, HIV, drug use, knowledge, 113

self-administration, cocaine, procaine, rhesus monkeys, delay-of-reinforcement, 37
self-administration, ethanol, alcohol, rats, drug reinforcement, multiple schedules, persistence, relative reinforcing effects, 71
self-monitoring, methadone maintenance, tobacco smoking, nicotine, 237
sensory, cigarette smoking, nicotine dependence, pepper, reinforcement, mood, 225
smoking, nicotine dependence, smoking cessation, nicotine addiction, tobacco use, 211
smoking cessation, nicotine dependence, nicotine addiction, smoking, tobacco use, 211
social support, methadone dosage, methadone maintenance, therapeutic compliance, 163
Spain, cocaine, epidemiology, trends, 45
startle response, alcohol deprivation, morphine withdrawal, cross-maze exploration, tail-flick test, 59
subjective effects, ethanol, diazepam, drug preference, individual differences, 243
subjective effects, nicotine, cognitive performance, humans, non-smokers, 11

substance use, medical and pharmacy students, Venezuela, diagnostic interview schedule, 121
suicidal ideation, hopelessness, HIV, intravenous drug users, depression, 99
symptoms, methadone, antisocial personality disorder, drug use, 253

tail-flick test, alcohol deprivation, morphine withdrawal, cross-maze exploration, startle response, 59
therapeutic compliance, methadone dosage, social support, methadone maintenance, 163
tobacco smoking, methadone maintenance, nicotine, self-monitoring, 237
tobacco use, nicotine dependence, smoking cessation, nicotine addiction, smoking, 211
trends, cocaine, epidemiology, Spain, 45
twin, association, addiction, cocaine, heroin, 161

United Kingdom, Adolescent Substance Use Questionnaire, reliability and validity, 191
urges, craving, cocaine, questionnaire, 19

Venezuela, substance use, medical and pharmacy students, diagnostic interview schedule, 121

young children, alcohol, odour recognition, family, alcohol education, 29
